## **About World Food Safety Day**

The World Food Safety Day is one of the key global programs organized to create awareness on various aspects of food safety. The importance of this celebration lies in the fact that each year worldwide, unsafe food causes 600 million cases of foodborne diseases and 420000 deaths of which about 30% of foodborne deaths occur among children under 5 years of age. WHO estimated that 33 million years of healthy lives are lost due to eating unsafe food globally each year. Thus, in recognizing the global burden of food borne diseases, which affect individuals of all ages, in particular children and persons living in low income countries, the United Nations General Assembly proclaimed in 2018 that every 7<sup>th</sup> June would be World Food Safety Day. The celebration of World Food Safety Day across the globe was recommended with the aims to draw attention and inspire action to help prevent detect and manage food borne risks, contributing to food security, human health, economic prosperity, agriculture, foods of animal origins, market access, tourism and sustainable development.

## **About Webinar**

To fulfil the main objectives of United Nations Organization for celebration of World Food Safety Day, this year “Center of Excellence for Advanced Research on Animal Food Safety” MVC, MAFSU is organizing World Food Safety Day, 2021 with the theme “Safe Food Now for a Healthy Tomorrow” on 7<sup>th</sup> June, 2021. The day will be celebrated by delivering the lectures of eminent experts on different food safety aspects and competitive quiz for PG, PhD students and faculties. The webinar will be of immense help to the students, faculty members, veterinarians and all other persons engaged in the food sectors.

## **Communication to Participants**

Those who will be selected will be informed through their registered email. A WhatsApp group will be created for selected participants and all the information related to the training will be provided in the group.
